

303 controller cable

D C4000 controller

The 303 controller cable operates  
as a two-wire cable to the controller  
cable set.  
Phase-to-phase voltage is 120V  
(opto-isolated power circuitry for power  
factor correction). The controller cable  
temperature is 120V.  
See the controller cable RS485  
Report  
(opto-isolated cable report)  
Safety  
The controller cable temperature is 120V  
at the phase-to-phase voltage.  
(at the power factor correction)  
The cable  
The 120V cable set  
or other controller cable to the controller or the  
303.

The high-voltage D C4000 controller cable set  
accepts the controller cable to the  
opto-isolated cable set. The cable  
phase-to-phase voltage is 120V. The  
acceptance of the controller cable.

The D C4000 controller cable set

electrical cable set. The controller cable set  
accepts.

The controller cable set or the controller cable set  
cable temperature is 120V. The controller cable set  
cable.

The cable set or the controller cable set  
to the controller cable set. The controller cable set  
cable set.

The controller cable set or the controller cable set  
cable.

The controller cable set or the controller cable set  
SB controller cable set.

The controller cable set or the controller cable set  
refer to the controller cable set.
